

STOP THE KEYSTONE XL PIPELINE

TAR SANDS: The Dirtiest Oil on Earth

New York Interfaith Power and Light | www.nyipl.org

Dear President Obama:

I am extremely concerned about the Keystone XL Pipeline and feel the issuance of a Presidential permit is not in the national interest. The Keystone XL Pipeline to Texas ports will fuel the world's oil addiction for another 50 years— as we scrape the bottom of the barrel to get the last drop of the Earth's dirtiest and most damaging oil.

As a person of faith, I believe it is in the national interest for you to lead the nation in an urgent response to the climate crisis through implementation of better fuel efficiency standards for cars and trucks, better clean air safeguards, EV cars fueled by a renewable grid, and more robust energy efficiency and renewable energy standards. If we approve the tar sands pipeline we will undermine our forward progress in transitioning America to a clean energy future.

The Keystone XL tar sands pipeline is not in the public interest.

Sincerely,
